WINTER ❄️ | ☀️ SUMMER

Rental, sale, customised construction and management of BigAirBag® activity parks

Usable summer and winter and suitable for all ages and abilities

Turnkey solutions for

- ➔ Events
- ➔ Tourist destinations
- ➔ Shopping centres
- ➔ Entertainment and celebrations

Highly enjoyable, our activity parks attract families, youngsters and sports people

PROSESS BOX-PARKS

The year-round multi-activity concept

For fun, training and excitement, Prosess Box-Parks allow all ages to experience a unique sensation in complete safety.

Event and tourism organisations throughout Switzerland choose Prosess' Box-Parks to offer a unique experience to attract and retain their guests.

Needs analysis and advice

Depending on the location and the space available, there are many possibilities. Prosess takes into account each customer's individual requirements to offer a customised solution.

As a general rule, with a throughput of up to 300 jumps per hour, up to 5 people per minute can jump from a Prosess Box-Park, allowing a large number of visitors to enjoy the activity

BOX-PARK MINI ☀️ ❄️

Prosess' Box-Park Mini is the ideal solution where space is limited, or access is difficult

The Box-Park Mini is quickly assembled and disassembled and is popular, for example, with shopping centres who want to offer a "pop-up" activity to their clients. An open-day or sales event, inside or outside, are typical usage scenarios.

Jump from 1.5m

A single jump provides the same sensation as Prosess' larger Box-Parks and can be used from only 3 years of age.

Combined with a promotional stand, a Box-Park Mini creates a unique marketing tool

With its small footprint and ability to attract families and children, companies and tourist destinations who exhibit at fairs and events can increase foot traffic and strengthen their brand or destination with a Box-Park Mini.

BOX-PARK MOBILE ☀️ ❄️

Prosess' Box-Park Mobile was created for short-term use – activities, events, celebrations, training and team-building.

The Box-Park Mobile is transported by trailer and can be easily manoeuvred. As a result, it can be delivered to most places. When access is difficult, Prosess will be happy to analyse the access and provide a quote for special transport.

Three jumps - from two different levels (1m and 3m) and from a trampoline

The standard version of the Prosess Box-Park Mobile includes two different platforms for all levels of ability, as well as a professional trampoline for tricks and more fun.

Modular design – slackline and ramp options

On request, a Prosess Box-Park Mobile can be adapted to the needs of each client. Typical additional uses include a slackline and a ramp for use with Rollerblades, scooters and bikes, but Prosess will be happy to analyse any special requirements and develop a custom solution.

Supervision

To ensure a safe environment, Prosess Box-Parks must be supervised at all times. Prosess is able to provide trained and experienced staff to fulfil this important role, but customers can also provide their own staff to replace or supplement the Prosess staff, upon request.

FULLY CUSTOMISABLE TO BRING SIGNIFICANT VISIBILITY TO A BRAND OR DESTINATION

A Prosess Box-Park is a fun activity that catches the eye and brings everyone together - children, adults and families. It offers a unique marketing tool that can associate the image of a brand or a destination with a strong and long-lasting memory.

Renting a Prosess Box-Park Mini or Mobile is a no-hassle experience and as the park can be set up in less than 2 hours, a rental for only 1 day is possible, depending on the transport distance. Prosess will take care of everything – transport, set up, supervision and dismantling. Request an all-inclusive offer, including liability insurance, and we will reply as quickly as possible with availability and prices.

CUSTOMISED ACTIVITIES ☀️ ❄️

Customised activities for tourist destinations and events
– winter, summer or year-round

For destinations that require a customised and long-term solution, Prosess will discuss the requirements, analyse the location and space available and provide a comprehensive offer.

No project is too small or too large and Prosess provides seamless customer service from the day you make your initial request, through construction to product installation and beyond.

For an example of what is possible, see the year-round solution that Prosess developed for the tourist office in Anzère, Valais.

The ultimate summer activity – a 100m waterslide

Developed and manufactured by BigAirBag® with the same quality materials as their airbags, Prosess' 100m waterslide provides a highly enjoyable activity for all ages.
