

BIGAIRBAG[®] COMING

BIGAIRBAG[®] RENTAL & SALES

WINTER ❄️ | ☀️ SUMMER

Rental, sales and after-sales of BigAirBag[®] equipment

With more than 10 years of experience and over 1000 installations worldwide, BigAirBag® is the world's leading manufacturer of airbags for freestyle sports, action sports and leisure applications. Their products are constructed exclusively in Holland using the finest German made materials, manufacturing techniques and machinery.

BigAirBag® has become an all-season attraction that can be used to create many thrilling, unforgettable and unique activities for extreme sports, adventure experiences and events.

Prosess has been a passionate partner of BigAirBag® since 2013, when it brought to Switzerland the world's largest BigAirBag® at the time, the "Revolution".

Guaranteed quality

All BigAirBag® products are developed, designed, manufactured and stringently tested for safety & quality at a high-tech production facility in Holland. Only the finest German made materials from Mehgies and Sioen are used and the most advanced production techniques available have been incorporated to guarantee the very best quality. All BigAirBag® products come with an internationally recognised quality & safety certification from the TÜV and Vinçotte.

Contact us to discuss your individual requirements and allow us to offer you a personalised quote.

BigAirBag® Models

Depending on availability and requirements, Adventure, Revolution & Freestyle airbags can be rented from Prosess.

Adventure

The low-profile, highly advanced BigAirBag® Adventure features multiple air-pillars that absorb impact individually, allowing for simultaneous landings from 8m above ground level. Due to its unrivalled softness and durability, the BigAirBag® Adventure is rapidly becoming a much-loved attraction at adventure parks, adventure playgrounds, freestyle parks and gymnasiums across the globe.

Revolution

Tested from over 60m above ground level, the BigAirBag® Revolution can deal with the heaviest of impacts and the hardest of falls. The BigAirBag® Revolution provides super soft, super safe landings with incredible impact-absorbing qualities. Our BigAirBag® Revolution is branded "Anzère", but can be adapted to provide no branding or an alternative branding.

Freestyle

The BigAirBag® Freestyle provides excellent impact absorption and an easy exit for maximum throughput. Due to its robust and lightweight construction, the Freestyle model is the most popular airbag in ski resorts, skate parks and bike parks. The ideal airbag for public ski and snowboard jumps as well as freestyle demonstrations.

All of the featured airbags, including the Landing, below, can be purchased from Prosess.

All airbags are 100% customisable, whether for colour and design or shape and size.

Landing

The BigAirBag® Landing redefines the athlete limitations and advances progression in freestyle action sports. The revolutionary design and fully customizable shape mean the jump bag adopts the contour of the landing area it covers, providing fall safe protection at the knuckle, on the landing ramp itself and finally in the run-out area. The result is an ultra-realistic training platform that mimics a real landing ramp delivering better impact absorption than a foam pit while still remaining more forgiving than a resi ramp.
